

**REMARKS**

On September 9, 2002, applicants submitted a Response to Restriction Requirement. On July 10, 2003, applicants' attorney, Pierre Van Rysselberghe, contacted Examiner Jon Epperson to inquire about the status of the above-identified patent application because applicants had not received any further communication from the Patent Office. The Examiner informed applicants' attorney that a Supplemental Restriction Requirement was mailed out on November 11, 2002. Applicants were apparently given a one month shortened statutory period to respond to the Restriction Requirement. However, applicants never received the Supplemental Restriction Requirement. Accordingly, applicants filed a Petition on October 27, 2003 requesting reinstatement of the application. On August 30, 2004, applicants received a Decision granting applicants' petition (copy attached as Exhibit A). The Decision states that "the application will be forwarded to the Examiner for mailing of a Supplemental Restriction."

Applicants subsequently contacted the Examiner and proposed sending in this Supplemental Amendment with a new claim set to replace the previous set, hopefully avoiding any need for a Supplemental Restriction Requirement.

Accordingly, please enter and consider the new claim set.

New claims 34-47 are directed to methods of conducting multiplexed experiments. Support for the claims can be found in the specification as follows:

Claims	Support
